

Getting a Swallow Study

My doctor wants me to get a swallow study.

It will show the doctor where my food and drinks go after I put them in my mouth.

A swallow study takes pictures of me eating and drinking.

I will sit in a chair while I eat and drink.

There will be other people in the room while I eat.

A family member or caregiver will be right next to me.

I can watch a video or listen to music if that will help!

It will not hurt.
